

United States Emission Breakdown

This Data is collected by EPA(Environmental Protection Agency) in 2023

Total Emissions

GHG emissions across all US counties (mtons CO₂e)

562.46M

Total Population

Combined population of all counties

318.56M

Avg Emissions per Person

Population-weighted average (mtons CO₂e per capita)

1.77

Counties Analyzed

Total US counties

3142
